

NEW VERSION

Nikon PictureProject 1.6

Nikon Software for Digital Image Organizing, Editing, Design and Sharing

Nikon PictureProject is a valued tool, designed to compliment picture taking with exciting and enjoyable photography projects. It's the perfect compliment for any digital camera user and provides a selection of digital tools that will help any photographer, from amateur to professional more effectively enjoy their photography and organize their digital image files.

Organizing: does your picture taking history include storing your pictures in a "shoebox?" If you answer yes, then chances are that's similar to the way you have turned your computer into a digital image shoebox; without organization and always a challenge to find the right picture. With PictureProject's Organize feature you'll be able to easily organize your images into collections, apply easy-to-use keywords to each picture all to help make finding your pictures as easy as pie!

Go Wireless: when you use PictureProject with a Coolpix P1 or P2 digital camera, you can transfer images directly to your computer and into installed PictureProject and run a slideshow on-the-fly! Each shot will come up on screen and will automatically be organized by transfer session. A first from Nikon.

Editing: see the scene, take the picture... and in PictureProject a quick click of the Auto Enhance button and your pictures will have an extra sparkle! Or open the Image Properties tool and change the file name, confirm the image date, add a tag for image identification, protect or even hide an image. For personal control, the Photo Enhance Tools lets you adjust brightness, Boost color brilliance, apply Photo Effects to change your color images into B&W or Sepia, Sharpening the image to your taste and even Straighten a tilted image. Whether you make changes with your own personal control, or you let PictureProject's Auto Enhance Button do it for you, you will get a beautiful shot made even more beautiful.

Design: print pictures from within PictureProject, you can print them individually, or in groups, or make extra copies. Also choose from a selection of templates and design album pages that you can print. It's all easy you'll revel in excitement and personal creativity.

Markers: a very cool feature that lets you invisibly mark your image's editing changes along the way. This way you're just one click away from reviewing any marked step. It's a convenient tool that simplifies your work and let's you work faster.

Key Words and Search: don't you just wish you could quickly find your vacation pictures from January 30, 2004? You can with a simple date search, or if you used Keywords, you could find your pictures through an applied descriptive word or multiple words for each picture, and you could if you had a tool that could find your pictures according to keywords, date, date period, tag marks, protect marks and hidden marks. Even by file name you can locate images from anyplace on your computer's hard drive; they're organized with PictureProject!. Use all the available image markers and powerful Search Tool and you'll never be at a loss to find an image! That's the power of Organizing your images and PictureProject gives you that power!

Share: you can easily share your pictures with family and friends using PictureProject E-mail feature or easy to use Printing features.

And there's so much more: you can review IPTC headers, voice memos, collection information, view files as thumbnails, via file name and view list details.

Expandable: Available for separate purchase, you can add a **Nikon Plug-in for Coolpix Camera Remote Control** and you'll remotely control selected Nikon Coolpix models: add the **DVD Show with muvee Plug-in** to make and save amazing DVD and Video CD shows you can share with almost anyone; and add the **nik multimedia Color Efex Pro Filters** to release your creative energy and make your pictures into beautiful works of art. It's fun, it's easy and it's all about making your pictures better than ever.

With PictureProject you can *Transfer* images from memory cards automatically or *Import* them with PictureProject's easy to use tools. You can *print* from within Picture Project, *e-Mail* your images, show *Slide Shows* with exciting image transitions and added music, you can one-click to *Auto Enhance* your image, and *Auto delete Red-eye* too!

If you want to e-mail the files, no problem - all your changes will be put into the e-mailed version. Want to edit your picture in Nikon Capture, just right-click on the image and then click on "Open in Nikon Capture." Capture will read all the settings and let you save the image as JPEG, TIFF or even NEF (the powerful Nikon Electronic Format) raw file type.

And with the combined power of Nikon PictureProject, Nikon Capture and Nikon plug-ins, you'll enjoy your digital photography hobby as

never before, and you'll see sparkling images that you'll be proud to show off and share with friends and family.
