**New York Times**  
**September 22, 2005**

"At just 4.4 inches wide and 1.4 inches thick, this stylish six-megapixel camera – with a swiveling lens that shoots with 35-millimeter quality – is small enough to carry in your pocket."

"And its 10x optical zoom can amplify subjects more than three times as much as any other camera in its class, making it ideal for amateur paparazzi or parents at school sports events."

"The camera has a 2.5-inch screen and a feature that can flag the best exposure from among several pictures of the same scene."

"And it detects the presence of faces in your shots, then makes sure they are in focus."
