## AF DX Fisheye-Nikkor 10.5mm

JUL/AUG 2004

### American Photo - Editor's Choice: July/August 2004

Praising it as the "first and only" lens with a 180-degree, full-frame fisheye angle of view, the editors of American Photo designated the Nikon AF DX Fisheye-Nikkor 10.5mm f/2.8G ED lens as an Editor's Choice. They also laud the lens' superb ability to focus down to 5.5 inches. The editors were also awed when they were able to use Capture 4 software to turn the lens into a "rectilinear" optic.
