In the August 2005 issue of Popular Photography and Imaging, the editors review the highly admired Nikon AF-S DX Nikkor 18-70mm f/3.5-4.5G lens. Upon completing some rigorous tests, the editors had this to say, "This lens is perfect for portraits and general photography." Commenting on the lens' quality construction, SQF performance, and consistency of results, the editors conclude that Nikon's 18-70mm lens is "an excellent multipurpose, everyday mid-level zoom, there's nothing 'mid-level' about its image quality or handling. Both are exceptional."
